Hospital Information System

Aim

To create a cloud-based Online Super Market System using Zoho Creator (SaaS) for managing products, customers, orders, inventory, and payments efficiently.

Algorithm

1. Start the application.
2. Open Zoho Creator and log in with your Zoho account.
3. Create a new application named Online Super Market System.
4. Create forms for:
 - Customer Registration
 - Product Details
 - Order Details
 - Payment Details
5. Add required fields such as Customer Name, Product Name, Category, Price, Quantity, Stock, Order Date, Delivery Address, Payment Method, and Order Status.
6. Assign appropriate field types (Single Line, Number, Currency, Dropdown, Date, Email, Phone, etc.).
7. Apply validation to ensure mandatory fields are completed before submission.
8. Save all records in the Zoho Creator cloud database.
9. Create reports to view, search, edit, and delete customer, product, and order records.
10. Design dashboards to display:
 - Total Products
 - Total Customers
 - Total Orders
 - Available Stock
 - Low Stock Products
 - Delivered and Pending Orders
11. Test the application by adding sample records and verifying reports and dashboards.
12. End the application.
