

Flight Reservation System using Zoho Creator (SaaS)

Exp-1

Aim

To create a simple Flight Reservation System using Zoho Creator to demonstrate the Software as a Service (SaaS) cloud model by creating forms, reports, dashboards, and workflows.

Algorithm

1. Start the Zoho Creator application.
2. Create a new blank application named **Flight Reservation System**.
3. Create a form named **Flight Reservation**.
4. Add all required fields such as Passenger Name, Email, Mobile Number, Trip Type, Flight Type, From, To, Departure Date, Return Date, Travelers, Class, Fare Type, Payment Method, and Booking Status.
5. Configure the dropdown and radio button values as required.
6. Save the Flight Reservation form.
7. Create a **List Report** named **Flight Booking Report** to display all reservations.
8. Create a **Dashboard/Page** and add a title, a **New Reservation** button, and the **Flight Booking Report**.
9. Create a workflow using **On Success** to automatically change the Booking Status to **Confirmed** and display a success message.
10. Test the application by entering sample reservation details and submitting the form.
11. Verify that the booking is stored in the report and displayed on the dashboard.
12. Stop.

Form:

The screenshot displays the Zoho Creator interface for a 'Flight Reservation System'. On the left, a dark sidebar contains a menu with options: 'Flight Reservation' (selected), 'Flight Reservation Report', and 'DashBoard Flight'. The main area shows a form titled 'Flight Reservation' with the following fields: 'Passenger name' (text input), 'Email' (text input), 'Phone' (text input with a country code dropdown set to '+91' and the number '81234 56789'), 'Trip Type' (radio buttons for 'One way', 'Round', and 'Choice 3'), 'Flight Type' (radio buttons for 'Domestic', 'International', and 'Choice 3'), 'From' (dropdown menu), 'To' (dropdown menu), 'Departure Date' (text input with a date picker), and 'Return Date' (text input with a date picker). The top of the interface shows the application name 'Flight Reservation Systems', a 'Development' mode indicator, and user information including 'View as -MySelf-' and a trial expiration notice.

Result

Thus, the Flight Reservation System was successfully created using Zoho Creator, and the reservation details were stored in the cloud using the Software as a Service (SaaS) model.
