Student Information System

Aim

To develop a cloud-based Student Information System using Zoho Creator (SaaS) for managing student details, academic records, attendance, and course information efficiently.

Algorithm

1. Start the application.
2. Log in to the Zoho Creator account.
3. Create a new application named Student Information System.
4. Create forms for:
 - Student Details
 - Course Details
 - Attendance Details
 - Academic Records
5. Add required fields such as Student Name, Register Number, Department, Year, Email, Phone Number, Attendance Percentage, Course Name, Marks, and Grade.
6. Configure appropriate field types (Single Line, Number, Email, Phone, Dropdown, Date, etc.).
7. Apply validation to ensure mandatory fields are entered correctly.
8. Save the student records in the Zoho Creator cloud database.
9. Create reports to view, search, edit, update, and delete student records.
10. Design dashboards to display:
 - Total Students
 - Department-wise Student Count
 - Attendance Summary
 - Grade Distribution
 - Pass and Fail Statistics
11. Test the application by adding sample student records and verifying the reports and dashboards.
12. End the application.

DASHBOARD:

Result

Thus, the Student Information System was successfully developed using Zoho Creator (SaaS). The application efficiently manages student information, courses, attendance, and academic records with cloud-based storage, reports, and dashboards for easy access and administration.
